Kuningan, Setiabudi, Jakarta Selatan

Software Engineer at PT. Bank Negara Indonesia (Persero) Tbk with deep expertise in enterprise backend systems (.NET 8, ASP.NET Core, SQL Server, Ocelot Gateway) and native mobile engineering (iOS & Android with React Native). Proven track record architecting high-concurrency microservices, spatial geofencing verification, multi-stage approval engines, and production mobile applications used nationwide by thousands of BNI employees.

WORK EXPERIENCES

PT. Bank Negara Indonesia (Persero) Tbk — Central Jakarta, Indonesia

Software Engineer — Mobile 2026 - Present

- Led mobile engineering for **Branch Navigation** (iOS & Android) actively used by thousands of BNI employees across regional and branch offices nationwide; published to **Google Play Store**.
- Implemented **biometric authentication** (fingerprint & face recognition) and push notification pipelines via **Firebase Cloud Messaging & APNs** enterprise distribution.
- Integrated secure REST APIs with backend microservices; remediated security findings across **SAST, DAST, penetration testing**, and performance test suites.

Software Engineer — Backend Sep 2023 - Present

- Architected the **BNI Frontliners System** .NET 8 **ServiceRating** microservice with **EF Core** and **Ocelot API Gateway** upstream routing.
- Implemented branch **spatial geofencing** and **AES-encrypted QR tokens** for tamper-resistant physical presence verification.
- Engineered high-concurrency race condition guards using **SemaphoreSlim** and ACID database transactions to prevent double-submit anomalies.
- Modeled **multi-tier organizational hierarchy snapshotting** across regional, branch, and unit tiers ensuring immutable historical auditability.
- Developed dual-scope rating APIs (frontliner CS/Teller service and branch facilities), real-time fraud mitigation, and complaint settlement workflows.
- Hardened application security via **IP rate limiting, OWASP response headers, XSS sanitization**, and in-memory caching backed by automated test suites.
- Designed multi-stage approval workflow engines (submit → review → approve → extend/close) using hybrid EF Core and stored procedures; authored technical specs for maker-checker banking workflows.
- Optimized SQL Server query performance through index-seek and cardinality-estimate tuning; conducted stored procedure assessments across authentication, biometric, and benefits modules.
- Implemented SSO via LDAP, hierarchical RBAC (pusat, wilayah, cabang, outlet), server-side caching, and IIS deployment pipelines compliant with BNI SAST/DAST standards.

PT. SAB Indo Industries — Cimahi, West Java Mar 2023 - Aug 2023

Web Developer Intern

- Analyzed HR recruitment workflows and built an internal candidate evaluation web system using PHP (CodeIgniter) and MySQL for SpeedJersey operations.

PT. Bahana Global Solution — Bandung, West Java Sep 2022 - Dec 2022

Mobile Developer Intern

- Developed Android application PBPRSI using React Native, collaborated with backend engineers on REST API integrations, and designed UI wireframes in Figma.

EDUCATION LEVEL

Universitas Komputer Indonesia — Bandung, West Java Sep 2019 - Sep 2023

Bachelor of Informatics Engineering (GPA: 3.23)

- Final Thesis: Recruitment Management Information System — focused on software engineering, database design, and web architecture.

SKILLS, ACHIEVEMENTS & OTHER PROJECTS

Key Projects: **BNI Frontliners System** (.NET 8 ServiceRating microservice, Spatial Geofencing, AES QR, SemaphoreSlim); **Branch Navigation Mobile & Web** (React Native, FCM, APNs, Biometric Auth, Workflow Engine); Production Information System (PT SAB); Healthcare Forecasting System (UPTD Talaga).

Certifications & Achievements: Certified Junior Web Programmer (BNSP, 2023); Published Branch Navigation to Google Play Store.

Backend & Architecture: .NET 8, ASP.NET Core, C#, EF Core, Ocelot API Gateway, Microservices, SQL Server (Spatial/T-SQL), Concurrency (SemaphoreSlim), IIS, REST APIs.

Mobile & Frontend: React Native, iOS, Android, Firebase (FCM), APNs, React, JavaScript, Razor Pages, PHP (CodeIgniter), MySQL, Figma.

Security & Operations: SAST / DAST / Pentest Remediation, OWASP Top 10, AES Encryption, IP Rate Limiting, Git, LDAP SSO, RBAC.

Soft Skills: Problem Solving, Critical Thinking, Cross-team Technical Communication, Agile / Scrum Collaboration.
